Submitted By: SSGT Bishop
From: NAMTRAU OCEANA
Code:

Issue: PREMTRR:
1. CANTRAC shows incorrect system name and course title.
2. CANTRAC does not list all prerequisite courses.

Recommendation: PREMTRR:
1. Change all references to AN/USM-636(V) vice "AN/USM-636A(V)."
2. Change course title in CANTRAC to AN/USM-636(V) Consolidated Automated Support System (CASS) Advanced Maintenance/Calibration Intermediate Maintenance vice "AN/USM-636A(V) Consolidated Automated Support System (CASS) Advanced Maintenance/Calibration Intermediate Maintenance."

01MTRR: Correct CANTRAC data to reflect correct course title and prerequisites.

Advisory Committee: Correct CANTRAC, close chit.

Policy Committee: (1) Ensure CANTRAC reflects correct course title and prerequisites.
(2) Ensure NITRAS/CANTRAC reflect correct activity name (NAMTRAU OCEANA).

Resource Required: NO

Resource Comments: NONE

Action Task: (1) Ensure CANTRAC reflects correct course title and prerequisites.
(2) Ensure NITRAS/CANTRAC reflect correct activity name (NAMTRAU OCEANA).

Issue: CASS Calibration School currently has a requirement of being an E5 to be accepted for training, however in practice, most commands use Airmen and 3rd Classes to perform calibrations and maintenance; an utilize their qualified personnel as inspectors. Why not provide the training to the personnel who will be doing the work?

Recommendation: Change the minimum to AT3 or an experienced ATAN. These individuals will be capable of following the instructions within the calibration procedures as well as senior PO. This change will ensure a qualified technician will be performing the calibration and then, in turn, a qualified supervisor and CDI (E5) will be there to make sure everything is performed properly according to the Calibration procedure.

The regular METCAL calibration NEC: 6673 says minimum requirement is E-3 to E-6, so why is CASS Calibration School more stringent than the technician who calibrates the standards that are used to calibrate CASS?

01MTRR: Fleet feels that a valid requirement exists to provide additional calibration qualified personnel. We recommend that the prerequisite requirement for this course be changed to E4 or 2 years fleet experience.

Advisory Committee: Recommend change to NEC Manual, personnel paygrade only.

Policy Committee: DISAPPROVED. Policy and courses will remain the same.

Submitted By: AT1 GRAHAM
From: USS GEORGE WASHINGTON
Code:

Issue: Fleet has need of increased numbers of calibration techs. Simple remove and replace maintenance actions can require two technicians, (6704 install, 6705 cal).

Recommendation: Move Hybrid/RF/CNI calibration to Common Core. Move EO/HP cal to their respective courses.

01MTRR: Refer to CASS.01MTRR.6101.08 Advanced course prerequisite change. Fleet reps feel that moving cal theory out of the Advanced course is unwarranted. We feel that a change in prerequisite is more prudent.

01MTRR comments:

(1) SSGT Woods - It is essential to move the CAL portion into the core courses. Not doing this is causing shops to not have enough techs. We have all E-3's and E-4's but because of rank and time limitations, they cannot get the CAL qualification. CAL is no more difficult than running a WRA. An E3 straight out of school is just as capable as an E6, with time in service, to perform CAL. The E3 needs the certification.

(2) AT1 Graham - This may not be the best option, but I believe that every CASS tech should be allowed to at least run calibration tests and certify them. This would save man-hours as well as increase the knowledge base of our younger techs.

(3) SSGT Jacobs - It is unrealistic to place a rank/grade limitation on an operator to perform CAL. CAL of a station is a very simple task that my LCPLs right out of school can do. The prerequisite of a paygrade is not realistic as to how maintenance/CAL is really done. The bottom line is that the fleet (Navy) needs

MTRR ACTION ITEMS

more techs that are CAL qualified ASAP: I believe that CAL should be in common core, it is not an Advanced Maintenance task!

Submitted By: ATC(AW) E. OITZMAN
From: USS GEORGE WASHINGTON
Code:

Issue: NAVAIR platform offices are developing interactive CAI in support of Test Program Sets in an attempt to provide knowledge and skills unique to a WRA as tested on CASS. After reviewing the APS-137, CASS Block II difference training and preliminary CASS EOSS+ CAI, several shortfalls exist.

Example: Narrative does not match visual presentation, i.e. the narrator is 2 - 3 steps ahead of the video, improper tools used and replication of technical publication data that is subject change and which renders the CAI inaccurate. These inconsistencies from one video to the next do not allow the NAMTRA's to include and use in various OTPS laboratory situations.

Recommendation: Allow the CASS CCMM to review and provide inputs for all current and future CAI projects to provide consistency and an instructor-based perspective prior to final fleet delivery. Coordinate with NETPDTC Norfolk Regional Electronic Media Center to assign a "PIN" number to each CD-ROM video. This facilitates a smooth addition and inclusion to the applicable CASS training track.

01MTRR: Concur with recommendation.

Advisory Committee: Concur, recommend NAMTRAGRU be incorporated into a QA/oversight role.

Policy Committee: NAMTRAGRU HQ: Identify and assign individual that will perform QA function and provide oversight to the process.

Resource Required: NO

Issue: CASS Block III stations are projected to be delivered to the Fleet end of calendar year 2001. Currently there are no Block III stations at NAMTRAU Oceana or NAMTRAU North Island, Det Miramar to facilitate necessary training.

Recommendation: Arrange for the delivery, installation and verification of two (2) CASS Block III stations to NAMTRAU Oceana and NAMTRAU North Island, Det Miramar prior to Fleet Delivery. These are in replacement of existing Block I stations. Site configurations will be determined cooperatively by PMA-260 and NAMTRAU Oceana, but will replicate station configuration percentages at fleet IMA's. Request NAMTRAU Oceana instructors be able to participate in TECHEVAL process to acquire difference data for incorporation into existing courses.

01MTRR: Concur with recommendation.

Advisory Committee: Approx 50 of 450 fleet CASS stations will be Block III's. Replacement not required. Recommend no replacement, however, upgrade on same level with fleet.

Policy Committee: NAVAIR (PMA260): Upgrade NAMTRA assets in concert and same percentage as fleet assets.

Resource Required: YES

Resource Comments: Upgrade NAMTRAU Oceana and NAMTRAU North Island, Det Miramar CASS stations to Block III configuration.

Issue: Need to assign an RT-CASS SME (6469) prior to Cadre Training, (NLT Summer 01). SME needs to be involved with SOW, curriculum development, etc. Said SME will be required to stand-up the course.

Two additional SME's (6467) need to be identified to attend Cadre Training. This will allow the schoolhouse to have one class on deck at a time. When throughput requirements are identified, if additional classes are needed then instructor allocations will have to be increased as required.

Recommendation: 01MTRR: Concur with recommendation.

Advisory Committee: Concur - task ASL-34 and MMEA to assign CASS (6469) technician to schoolhouse. Staff NLT Aug, 2001. Current or former CASS instructor would be ideal.

Policy Committee: NAMTRAGRU HQ: Submit instructor computation with TPP through chain of command.

Issue: There will soon be a requirement for R/T CASS training to support "I" Level training of the V-22 maintenance personnel. There is no such training track currently established.

Recommendation: Establish a training track to include R/T CASS. Recommend students attend the existing 7 week Operator/Maintainer course and continue on to a R/T CASS course to be taught at MCAS New River. This R/T course is projected to be 2-4 weeks long. Need to establish CIN's for the course and the track.

Advisory Committee: After discussion, the committee concurred. Facilities for the R/T course have been identified at MCAS New River and CIN's could be established for planning purposes which could later refined.

01MTRR: Concur.

Policy Committee:

1. CNET: Develop an R/T CASS Op/Maint course (i.e. CIN and CDP) at VMMT-204 FREST MCAS New River.
2. EAMTMU: When notified by CNET; determine and establish appropriate pipeline.

Issue: NAMTRA doesn't have adequate supply of aircraft equipment (WRA'S/SRA'S) on hand to have a representative sample for each major type of equipment. (i.e., APG-73 radar for RF/High Power training.)

Recommendation: Provide a wide variety of equipment to NAMTRA for this purpose.

01MTRR:

(1) COMMON: Recommend close chit. Fleet input agrees that an adequate sampling out UUTs in present course satisfies fleet needs. High Power WRA requirements are to be covered in the HPDTS working group session.
(2) HPDTS: Requirement still exists. Recommend provide AWG-9 components to NAMTRAU Oceana and NAMTRAU DET Miramar. ESL data has been submitted. APG-65 components currently @ NAMTRAU Oceana are on 1 year temporary loan. Recommend permanent transfer of APG-65 assets to NAMTRAU Oceana from NAVICP. Serious degradation in lab time will exist, if assets are not provided.

Advisory Committee: Follow-up on ESL documents, generate degraded training reports as applicable. Refer to Action Item 650.97ILSMT.6102.018.

01MTRR:

(1) COMMON: Concur, close chit.
(2) HPDTS: Concur, acquire components.

Policy Committee: NAVAIR (PMA205): Investigate and provide component acquisition status to CNO (N789H4) NLT 1 Jun 01.

MTRR ACTION ITEMS

01MTRR:

Issue: The fleet feels that the expertise required in radar transmitter area requires specialization and a NEC and separate training track required.

Recommendation: Create a separate CASS RF course/track to include Indoctrination, RF Theory, ALQ-126, AWG-9, APG-65, APS-137, ALQ-99, APS-130. Add a RF NEC with 6704 prerequisite.

01MTRR: Training track developed for HPDTS with exception of ALQ-126 and APS-130 systems. Fleet feels that the HPDTS course does not require any ALQ-126 or APS-130 assets for training in the existing High Power course.

There is no valid requirement for APS-130 WRA and TPS for HPDTS training. As for ALQ-126 assets, we feel that ALQ-126 WRA's and OTPS sets should be acquired for use with the HPDTS course as an excellent candidate for HPDTS training.

Advisory Committee: Concur.

01MTRR:
(1) Concur with working committee.
(2) Recommend NAVAIR perform task analysis on DECM and ASE components. Complete NLT March 02.

Policy Committee: Refer to Action Chit CASS.98MTRR.6102.20 for actions assigned.

01MTRR: Concur.
(1) NAVAIR (PMA205-3E) investigate obtaining assets to utilize in course.

MTRR ACTION ITEMS

Provide disposition to OPNAV (N789H4) NLT 1 May 01.

- (2) NAVAIR (PMA205-3E) continue Job Task Analysis (JTA) to include APG-73, AWG-9, APG-65, AAS-38, DECM, and EETS.

Resource Required:
Resource Comments:

NO
NONE

Action Task:

Continue HIGH POWER course development.

01MTRR:

Issue: There needs to be a separate MOS/NEC for the High Power/RF course.

Recommendation: Assign an MOS for high power and RF (Radar) due to special skills - waveguide propagation, Radar theory and hazardous material handling (PAO). Include the total radar packages so IAW 4790 all items of a system will be run by one shop with all members fully qualified. Time requirements to obtain a fully qualified radar technician are exceedingly high now with specific training and would greatly increase without this training. This data can be verified through training jackets and MATMEPS. High manhours and extensive work days currently expended in the radar shops will support the more specialized training and MOS/NEC assignment.

01MTRR: NEC has been identified. ASL is working on MOS requirements. Refer chit to ASL-34 for action.

Advisory Committee: Concur.

01MTRR: Recommend chit remain open until final course approval and new MOS Manual is published.

Policy Committee: Refer to Action Chit CASS.98MTRR.6102.20 for actions assigned.

Issue: PREMTRR:
1. What is the MOS going to be for an EO CASS Marine?
2. Can we send 6466's (EOTS Techs) to just the EO portion of CASS School? And would their MOS change?
3. Are the other systems going to have unique MOS's also? I.E. - RF (RADAR), High Power, CNI (ComNav), HYBRID. And if so, what is going to happen to the 6467's?
4. If EO CASS Marines are going to have a different MOS, then what is going to happen with the 6466's, and when is the last class for EOTS?
5. If MOS is going to change, when are new MATMEP packages coming out?
6. How is manpower going to decide on T/O's for a workcenter with three different MOS's? - 6466, 6467, 64XX (EO CASS) and what is this going to do for their promotions?

Recommendation: 01MTRR: Refer to ASL-34 for action.

Advisory Committee: 01MTRR: Close chit after final approval.

Policy Committee: 01MTRR:
(1) ASL-34A - EO/FLIR CASS MOS 6472 - Skill Designator MOS in new MOS Manual dtd APR 2001.
(2) No "non-CASS" personnel must attend CASS Common Core (6 wks) prior to CASS EOSS+/FLIR (6 wks). Upon completion of track, student assigned skill designator MOS of 6472.
(3) Currently, only 3 MOS's for CASS: 6467 - CASS Operator/Maintainer, 6472 - EOSS+/FLIR, and 6473 - CASS HPDTS/RADAR.
(4) 6466's will transition to 6472 in the future. No transition plan in place until

Recommendation:

Suggest critical skills identified on attached sheet be extracted from existing course material (Model Managers) and consolidated into additional (number unknown) NEC/MOS awarding training tracks. Due to the critical nature of same, suggest NLT date be set at APR 01, 99 to be briefed at ILSMT.

01MTRR:

- (1) COMMON: Material used to generate EO+ course. Course trials are underway.
- (2) HPDTS: Information incorporated into High Power course. Course trials set for 2 May 01. Close chit.

Advisory Committee:

Concur, add additional training tracks and 2 additional NEC's and 2 additional MOS's.

01MTRR:

- (1) COMMON: Recommend close chit after course final approval.
- (2) HPDTS: Recommend chit remain open until final course approval and acquisition of WRA's.

Policy Committee:

Concur, EO and High Power/Radar appear to be significant enough to support unique tracks and NECs/MOSs.

1. NAVAIR (PMA-205): Pending PMA-260 action, submit NEC requests to support EO and High Power Radar.
2. CMC (ASL-34): Pending PMA-260 action, coordinate MOS request to support EO and High Power Radar.
3. CNO (N889H): Pending PMA-260 action, establish pipelines and courses that support the new concepts.
4. NAVAIR (PMA-260): Review CASS maintenance policy to address the emerging maintenance requirements of radar, high power and electro-optical systems. Provide any decisions that change the maintenance concept from the existing two NEC's (one MOS) required to support the CASS system (Station, OTPS/TPS, and UUTs). Manpower (NEC's and MOS's) and training will be

MTRR ACTION ITEMS

aligned to the maintenance policy by CNO (N889H) and CMC (ASL/ASM).

01MTRR:

(1) COMMON: Concur with Advisory Committee. Close chit after course receives final approval and course trials are completed.

(2) HPDTS: Leave chit open until final approval of course and new MOS's are incorporated in MOS Manual.

Resource Required:

NO

Resource Comments:

NONE

Action Task:

Develop CASS courses for Common Core, Cass Basic (NEC 6704), Electro Optics (NEC 67XX) and High Power (NEC 67YY) as discussed at the CASS MTRR and concurred with in NAVAIR (PMA-260) message R 172112Z DEC 98 Paragraph 2.

01MTRR:

(1) COMMON: Concur with Advisory Committee. Close chit after course receives final approval and course trials are completed.

(2) HPDTS: Leave chit open until final approval of course and new MOS's are incorporated in MOS Manual.

Issue: Need to establish Electronic Warfare (EW) CASS training pipeline at NAMTRAU Whidbey to support USN/USMC requirements.

Recommendation: 01MTRR:
(1) Recommend that EW training be established either through the establishment of a standalone EW training pipeline at NAMTRA Whidbey or the establishment of EW follow-on training at NAMTRA Whidbey similar to existing ALQ-99 Receiver training.

(2) Develop an EW training course at NAMTRA Whidbey containing the following topics: (Estimated length = 47 days)

Unit 1: INTRODUCTION TO THE COURSE AND PUBLICATIONS
Topic 1.1: Introduction to the Course
Topic 1.2: Publications and Technical Directives

Unit 2: INTRODUCTION TO ELECTRONIC WARFARE
Topic 2.1: Electromagnetic (EM) Radiation Principles
Topic 2.2: Electronic Warfare (EW) Principles
Topic 2.3: Electronic Attack (EA) Principles
Topic 2.4: Command, Control, and Communications Countermeasures (C3CM)
Topic 2.5: Suppression of Enemy Air Defenses (SEAD)
Topic 2.6: Air Defense Weapons Systems

Unit 3: INTRODUCTION TO EW EXCITER-GENERATORS
Topic 3.1: Introduction to Common EW Exiter-Generators
Topic 3.2: Correlated Threat Pulse Jamming

MTRR ACTION ITEMS

Topic 3.3: Correlated Threat Communication/Radar Jamming

Topic 3.4: EW Modulation Generation

Topic 3.5: Jam Frequency Development

Topic 3.6: Testing common EW Exiter-Generators on CASS

Unit 4: INTRODUCTION TO EW HIGH POWER TRANSMITTERS

Topic 4.1: Introduction to Common EW High Power Transmitters

Topic 4.2: Angular/Focused High Power Antennas

Topic 4.3: High Duty Cycle Jamming

Topic 4.4: High Power EW Transmitter Power Supplies/Amplifiers

Topic 4.5: EW Transmitter Coolant Systems

Topic 4.6: Testing Common High Power EW Transmitters on CASS

Unit 5: INTRODUCTION TO EW RECEIVER-PROCESSORS

Topic 5.1: Introduction to Common EW Receiver-Processors

Topic 5.2: Image Discrimination

Topic 5.3: Direction Tracking

Topic 5.4: Gain Tracking

Topic 5.5: Pulse Tracking

Topic 5.6: Modulation Pattern Processing

Topic 5.7: Processing Track Data and Threat Identification

Topic 5.8: Testing Common EW Receiver-Processors on CASS

Advisory Committee:

01MTRR: Recommend establishing a "EW" training track at Whidbey Island w/pipeline of CASS Common Core, Portions of HPDTS(EW), and Advanced Maint (as needed). Develop specific EO's supporting EW WRA's, i.e., AN/ALQ-99, APS-130, ASW-41, etc.

This course should be an NEC producer with a separate NEC due to the fleet requirements for this specific support. (separate NEC will allow detailers to track appropriately)

This track and NEC takes advantage of additional offload opportunities capitalized upon by the Navy and Marine Corps, potentially allows 3 - 5 separate NEC's to be combined into one and has the potential of allowing for additional serge capability within the CASS training pipelines.

Policy Committee:

CNAP (N422F): Establish a Navy EW training pipeline to include the following courses:

(1) C-600-3601 INDOCTRINATION

(2) C-198-3044 CASS COMMON CORE

(3) C-198-307X CASS EW

CNAP (N422F): Initiate paperwork to generate new NEC for EW pipeline.

Marine Corps personnel will not have additional MOS requirement. MOS 6484 will be awarded upon completion of EW pipeline.

Resource Required:

NO

Resource Comments:

NONE

Action Task:

Topic 3.4: EW Modulation Generation

Topic 3.5: Jam Frequency Development

Topic 3.6: Testing common EW Exiter-Generators on CASS

Unit 4: INTRODUCTION TO EW HIGH POWER TRANSMITTERS

Topic 4.1: Introduction to Common EW High Power Transmitters

Topic 4.2: Angular/Focused High Power Antennas

Topic 4.3: High Duty Cycle Jamming

Topic 4.4: High Power EW Transmitter Power Supplies/Amplifiers

Topic 4.5: EW Transmitter Coolant Systems

Topic 4.6: Testing Common High Power EW Transmitters on CASS

Unit 5: INTRODUCTION TO EW RECEIVER-PROCESSORS

Topic 5.1: Introduction to Common EW Receiver-Processors

Topic 5.2: Image Discrimination

Topic 5.3: Direction Tracking

Topic 5.4: Gain Tracking

Topic 5.5: Pulse Tracking

Topic 5.6: Modulation Pattern Processing

Topic 5.7: Processing Track Data and Threat Identification

Topic 5.8: Testing Common EW Receiver-Processors on CASS

Advisory Committee:

01MTRR: Recommend establishing a "EW" training track at Whidbey Island w/pipeline of CASS Common Core, Portions of HPDTS(EW), and Advanced Maint (as needed). Develop specific EO's supporting EW WRA's, i.e., AN/ALQ-99, APS-130, ASW-41, etc.

This course should be an NEC producer with a separate NEC due to the fleet requirements for this specific support. (separate NEC will allow detailers to track appropriately)

This track and NEC takes advantage of additional offload opportunities capitalized upon by the Navy and Marine Corps, potentially allows 3 - 5 separate NEC's to be combined into one and has the potential of allowing for additional serge capability within the CASS training pipelines.

Policy Committee:

01MTRR: Concur.

(1) NAMTRAGRU HQ: Create/develop new EW training course utilizing Training Situation Analysis (TSA) for establishing the requirements.

(2) CNET (ETE3221): Study/perform analysis of determining if all facets of additional CASS training at NAMTRA Whidbey is justified. Provide results to OPNAV (N789H4) NLT 1 OCT 01.

(3) CNET (ETE3221): Upon development, assign CDP/CIN to new EW course.

Resource Required:

NO

Resource Comments:

NONE

Action Task:

From: MALS-14
Code:

Issue: Need to establish Electronic Warfare (EW) CASS training pipeline at NAMTRAU Whidbey to support USN/USMC requirements.

Recommendation: 01MTRR:
(1) Recommend that EW training be established either through the establishment of a standalone EW training pipeline at NAMTRA Whidbey or the establishment of EW follow-on training at NAMTRA Whidbey similar to existing ALQ-99 Receiver training.

(2) Develop an EW training course at NAMTRA Whidbey containing the following topics: (Estimated length = 47 days)

Unit 1: INTRODUCTION TO THE COURSE AND PUBLICATIONS

Topic 1.1: Introduction to the Course

Topic 1.2: Publications and Technical Directives

Unit 2: INTRODUCTION TO ELECTRONIC WARFARE

Topic 2.1: Electromagnetic (EM) Radiation Principles

Topic 2.2: Electronic Warfare (EW) Principles

Topic 2.3: Electronic Attack (EA) Principles

Topic 2.4: Command, Control, and Communications Countermeasures (C3CM)

Topic 2.5: Suppression of Enemy Air Defenses (SEAD)

Topic 2.6: Air Defense Weapons Systems

Unit 3: INTRODUCTION TO EW EXCITER-GENERATORS

Topic 3.1: Introduction to Common EW Exiter-Generators

Topic 3.2: Correlated Threat Pulse Jamming

MTRR ACTION ITEMS

Policy Committee:

CNAP (N422F): Establish a Navy EW training pipeline to include the following courses:

(1) C-600-3601 INDOCTRINATION

(2) C-198-3044 CASS COMMON CORE

(3) C-198-307X CASS EW

(4) C-198-3043 CASS ADVANCED

CNAP (N422F): Initiate paperwork to generate new NEC for EW pipeline.

Marine Corps personnel will not have additional MOS requirement. MOS 6484 will be awarded upon completion of EW pipeline.
